Forge Neo — Upstream Update Report

2.29.2-6-gbd1d0159 → 2.30-11-g46af880c • 2026-10-14

From	2.29.2-6-gbd1d0159
To	2.30-11-g46af880c
Upstream commits	19
New tags	2.30

Part 1 — Upstream changes

Commits since last merge (19)

Commit	Subject
`46af880c`	api
`aa144fad`	refresh models
`af59a359`	settings
`dde0f320`	load_torch_file
`9cae3d60`	lines
`ede60e1a`	flash
`58700b99`	channels
`ce6848b8`	folder
`93c54c8f`	infotext
`45f41b81`	why
`899cf695`	yeet
`27f770cb`	update README
`90c2766d`	shape
`831d242d`	degrid
`9c39688d`	lint
`558e26c3`	sdpa
`8e073917`	batch_cond_uncond
`7aa43a98`	mps
`83391b92`	Qwen-Image-2.1

Part 2 — Fork merge report

Conflicts resolved

File	Resolution
`README.md`	Kept ours (Silk Custom readme).
`modules/processing.py`	Line-ending false conflict (ours LF, upstream CRLF). Took ours and hand-applied upstream's only real change: set_shift() now receives width/height (3 call sites). CUSTOM hr_additional_modules guard, Wan seed/prompt indexing and 0.60 denoise defaults preserved.

Custom work verified

Check	Status	Detail
canvas.js custom markers	**PASS**	All 8 found, 1989 lines
loader.py Qwen3 fp8 upcast	**PASS**	CUSTOM block intact at loader.py:280
utils.py resolution guard	**PASS**	CUSTOM guard intact at utils.py:84
generation_parameters_copypaste shim	**PASS**	File present
No LTX-Video wiring	**PASS**	Precise grep empty
ERNIE upstream only	**PASS**	Only upstream text_processing/ernie_engine.py
Changed .py/.js compile	**PASS**	py_compile + node --check clean
set_shift signature callers	**PASS**	All engines accept width/height; only third-party minimax-h3 (disabled) would break

Live test-drive

Launched	yes
Generation	**PASS**
Tracebacks	0
Notes	Krea 2 (eventHorizon_krea2V10) txt2img 512x512, 8 steps, seed 777 via API -> clean 357 KB PNG. User also ran two batches from the browser on the merged build. Console log capture was cut off after startup (launcher wrapper exited), so the traceback count covers startup only.

Notes

• New upstream: Qwen-Image-2.1 support, Qwen3-VL-8B TE for Krea 2, Batch Cond/Uncond option, resolution-aware shift, DeGrid script (needs triton, which we don't install), refiner dropdown rework, autocrop.py removed.
• No requirements.txt changes; comfy-kitchen unchanged.
• Third-party extension minimax-h3-forge-neo overrides set_shift(self, shift) without width/height; it is disabled, so not patched.
