

Forge Neo — Upstream Update Report

2.27-70-g650933bd → 2.28.1-10-ge782dc3f • 2026-08-20

From	2.27-70-g650933bd
To	2.28.1-10-ge782dc3f
Upstream commits	39
New tags	2.28, 2.28.1

Part 1 — Upstream changes

Dependency changes

Package	Was	Now
comfy-kitchen	0.2.22	0.2.31
opencv-python	4.11.0.86	5.0.0.93
httpx	0.24.1	0.28.1
GitPython	3.1.52	3.1.57
lark	1.2.2	1.3.1
omegaconf	2.2.3	2.3.1
psutil	6.1.1	7.2.2
pillow-heif	1.4.0	1.5.0
tqdm	4.67.3	4.70.0
setuptools	69.5.1	(removed)
requests	2.32.5	2.34.2

Part 2 — Fork merge report

Conflicts resolved

File	Resolution
README.md	Kept ours (Silk Custom readme).
modules/processing.py	Kept our None-guard semantics, rewritten in upstream's idiom as a walrus and marked # CUSTOM. Upstream's `or []` enters the branch when hr_additional_modules is None (its dataclass default) and passes None to modules_change() -> TypeError.

Custom work verified

Check	Status	Detail
canvas.js custom markers (8/8)	PASS	all FOUND; 1988 lines vs upstream 857 (2.3x). Untouched by upstream this range.
sd-forge-couple +3 tile indices	PASS	args[15]/[16]/[17]/[18]/[19] intact.
backend/loader.py fp8 TE upcast	PASS	# CUSTOM (Forge Neo) branch survived auto-merge at :281.
modules_forge/utils.py resolution guard	PASS	`if resolution <= 0:` present at :86.
generation_parameters_copypaste shim	PASS	re-exports infotext_utils.
ControlNet tabbed batch UI	PASS	gr.Tabs + try_load_supported_control_model at :499.

Check	Status	Detail
LTX-Video residue	PASS	precise grep empty.
custom ERNIE files	PASS	none tracked.
compile changed files	PASS	62 .py compiled, 0 failures; 0 .js changed.

Dependencies installed

- `pip install -r requirements.txt` (10 bumps)
- `requests==2.34.2`

Live test-drive

Launched	yes
Generation	PASS
Tracebacks	0
Notes	Krea 2 GGUF txt2img 768x1024, Euler/Simple, CFG 1.0. Startup 35.8s. Also exercised the new Krea 2 Edit reference path and the OpenPose ControlNet-LoRA end to end.

Notes

- BREAKING: `--bnb` removed from `webui.settings.bat`. Upstream 4e94f1fd deleted `bitsandbytes`; `shared_cmd_options.py:13` uses `strict parse_args()`, so the stale arg is a hard launch crash.
- 4 backend modules deleted into `comfy-kitchen` (`float.py`, `operations_bnb.py`, `operations_triton.py`, `quant_rotation.py`) - the 0.2.31 bump is mandatory.
- Krea 2 pose ControlNet-LoRA CONFIRMED WORKING via `ImageStitch` + `krea2_do_reference`. Depth ControlNet will NOT work (channel-concat needs ~20 lines in `backend/nn/krea.py`).
- `krea2_do_reference` is default-OFF and silently no-ops reference images; restored to OFF after testing because it breaks `img2img` while on.
- OPEN: reference-conditioned output shows heavy mottling/colour bleed; same prompt without a reference is pristine. Suspect the Qwen3-VL template lacks ostris's 'Picture N:' labels. Unverified.
- Upstream now flags PyTorch 2.10.0+cu130 as outdated at boot. Not acted on.
