Part 2 — Fork merge report

Conflicts resolved

File	Resolution
README.md	Kept ours (Silk Custom readme).
modules_forge/forge_canvas/canvas.js	Hand-merged. Kept our stamp/shape/Ctrl-line pointerdown block; applied upstream's fix: start temp_draw_points empty (handleDraw adds the first point, so no duplicate) and draw a 1px dot for a single click in the line-based branch. willReadFrequently auto-merged.

Custom work verified

Check	Status	Detail
canvas.js 8 custom markers	PASS	all FOUND, 1989 lines
node --check canvas.js	PASS	OK
py_compile on merged .py files	PASS	0 failures
LTX-Video residue	PASS	precise grep empty
Custom ERNIE files	PASS	only upstream's new backend/text_processing/ernie_engine.py (from 21886f41), not our old custom
loader.py fp8 upcast / utils.py resolution guard / cypypaste shim	PASS	CUSTOM markers present
LoRA folder picker (networks.py)	PASS	active_lora_dirs/ALL_LORA_FOLDERS intact after auto-merge
Extensions vs TextProcessingEngine rewrite	PASS	no extension imports the deleted text_processing engine modules

Dependencies installed

- comfy-kitchen==0.2.37

Live test-drive

Launched	yes
Generation	PASS
Tracebacks	0
Notes	Krea 2 GGUF (sickOllieKrea2GGUF_v10) txt2img 512x512, 8 steps, seed 777 via /sdapi/v1/txt2img -> HTTP 200, 357 KB PNG, clean image. Ran on an instance restarted outside this session at 11:53 (after the 11:51 merge commit), so its console log was not captured; API result is the evidence.

Notes

- Upstream rewrote the TextProcessingEngine (21886f41): per-model engines replaced by shared _comfy.py; qwen3vl/qwen3/t5/umt5/gemma/ministral3 engines deleted.
- Anima ControlLLLite mapping, offload/mem/guard VRAM changes, quant + mps tweaks.
